

# Integrating SharePoint and OpenText: It's Not Just the Technology

Brant Henne  
Marketing Director  
SeeUnity

# Content Integration Overview

- Content management/collaboration
- Drivers for integration
- Considerations when integrating
- Integration benefits

# Content Management & Collaboration

- SharePoint: flexible, user tools for collaborative content creation
  - Department / Practice Area / Firm (Intranet)
  - Clients / Courts / Customers (Extranet/Internet)
- eDOCS: broad platform for securing, managing and indexing content
  - Securing content
  - Accessibility through profiling

# Drivers for Integration

- Using the right tools for the job
  - Control, expand user experience through portals
  - Continue to secure content through ECM platform

# Considerations when Integrating

- Productized offerings versus services-intensive engagements
- SharePoint-based solutions should be expandable to meet evolving needs
- Identify areas where operational practices can be improved

# Integration Benefits

- Best tool for the job
- Improved accessibility reduces cost of search and minimizes risk
- Representing ECM content in new ways with portals = new application opportunities
- Optimize ECM licensing costs
- Maintain security
