

Smart DMS with SharePoint

August 21, 2014
3:30 pm – 4:30 pm

A wooden gavel is positioned diagonally across a computer keyboard. The background is a dark blue gradient. The text is overlaid on the image in a white, sans-serif font.

The legal professional's life is more dynamic than ever, requiring multi-device access to information from anywhere.

Come to this session to see top law firms share how they are utilizing SharePoint and Office 365 to replace traditional DMS tools, enabling content management functionality without ever leaving the applications users are used to working in — such as Microsoft Outlook and Word.

Discuss challenges and the vision of collaboration and knowledge-sharing.

Session Agenda

Our panel of IT and Business executives will cover a broad range of topics, as it relates to Document Management Systems

Such as...

Evolution of cloud and future computing environment

Cloud strategy and cross-platform vision

Business value of technology

Competitive advantage of utilizing top end technology

Challenge of device and data security

Meet our expert panelists

Jay Jurata

Partner

Orrick, Herrington & Sutcliffe, LLP

“Document management technology offers a “new” way of collaborating. But in order to drive adoption and make us better at our job, the solution needs to be incredibly intuitive, customizable for individual needs, and accessible from any device or location. In other words, it must integrate with the way attorneys actually work.”

Jay Nogle

Chief Information Officer
Greenberg Traurig, LLP

“Mobility is pushing cloud and cloud is pushing mobility... Data needs to be independent of the device, but we need to move beyond email, calendar and contacts to the stuff we make.”

John Anderson

Chief Information Officer
Shook, Hardy & Bacon

“Cloud has been around for a long time, they just finally put a name to it, and now the growth is exponential... Security is always going to be a factor, but 10-15 years ago, regular email wasn't safe, and now you can't exist in the marketplace if you don't use it.”

Shook,
Hardy &
Bacon LL.P.®

Chad Ergun

Director, Global Practice Services and Business Intelligence
Gibson, Dunn & Crutcher LLP

“We have an opportunity here to redefine Document Management Systems into something that supports today’s legal workforce. We need a smart solution that facilitates organic, self-operated knowledge management.”

Nathan Leong

Attorney

Microsoft Legal and Corporate Affairs (LCA)

“As a commercial attorney at Microsoft, I am working on multiple deals with internal business clients, Microsoft attorneys across different product groups and legal specialties, and external law firm partners. I am excited for a solution that will make it easier, so I can spend less time trying to find things and more time on my real job—supporting my clients and closing deals.”

Thank You

See you at ILTA
